SCANTIZER
Yes, it SCANS and SANITIZES

Temperature Screening Camera + Automatic Disinfectant Spray Dispenser in One Device

SAFER
It is safer with fast preliminary fever screening by a thermographic camera that respects physical distancing principle. Both the staff and customers feel more ensured of their safety.

FASTER
The dispenser automatically dispenses disinfectant spray to all visitors hands quickly. Suitable for public places with large flows of people, such as building entrances, shopping malls, schools, hotels, hospitals, etc.

SMARTER
With reporting features built in, it provides stats of visitors with normal temperature and those with elevated temperature. This modern device creates confidence for the organization and its customers.

1. Prevents, Detects and Screens
2. Kills Germs 99.9%

Fever Screening Thermal Camera
- Designed for measuring human body temperature
- AI Face Detection works on a large group of people with high speed and accuracy
- Temperature detection range: 30°C - 45°C (86°F - 113°F)
- Accuracy level within ±0.5°C (±1°F) without needing
- additional accessory. This level of accuracy can be used to screen elevated temperature which has to be confirmed by a secondary regular thermometer.
- Provides audio alarm when detecting a person with elevated temperature as well as LED (green/light) status

Automatic Disinfectant Spray Dispenser
- 2 spray nozzles left and right of the device and hand level
- Dispenses spray to the hands only
- Dispenses spray automatically as you bring your hands close to the device
- For use with 70% alcohol-based disinfectant solution that is safe for skin, which kills 99.9% of germs

Specifications:
